

PERCEPTION

Monthly Newsletter From the Students of PSGIAS

Welcoming the Freshers

PSGIAS has welcomed the first year students to the PSG family, with a brief introduction to the course. This was followed by a talk by our director Dr.P Radhakrishnan, Dr. J Kanchana, other prominent professors of the college. The students then attended a 3 day orientation on Mechanical Engineering.

Guest Lecture on Cloud Computing

On the 14th of July, PSG Institute of Advanced Studies had organised a guest lecture on Cloud Computing for students of mechanical department and research scholars. The speaker for the day was Mr. Ram Subramanian, an alumni of PSG College of Technology, currently working with Stanford University, California. In his lecture, Mr. Ram

Subramanian discussed the current scenario in Cloud Computing, usage of R Language in data analysis and his experience working in IT.

AMBIGIEZ

NEW OFFICE BEARERS

AMBIGEIZ, is the technical, cultural club of PSGIAS. It was founded by the students of the 2011-12 batch. It opens up doors for the students of PSGIAS to do something different, other than just studies.! Office Bearers for the academic year 2016-17 were appointed. Naveen Venugopal was elected as the chairman, assisted by secretaries Srivarsha and Priyadarshan, followed by 10 council members.

In-plant Training during Semester Break

Students of first and second year had undergone In-plant Training at various industries of their choice, during the semester holidays. This helped the students in gaining a hands on experience on the subjects that are taught in the classroom and have given them insights of various principles and ethics that are followed by the workers in the industry. The students have submitted a brief report of their observations in the industry, which will be evaluated and added to their semester marks.

OUR STUDENTS IN BANGALORE.

Ezenith Education had organised a five day automobile internship in the month of July at New Horizon College of Engineering, Bangalore. Seven students from our college participated and passed with flying colours. The workshop comprised of 2 days of theoretical sessions and during the next couple of days, students were given the opportunity to have a hands on experience in disassembling and assembling engines. A three cylinder 800 cc Suzuki engine, a four cylinder 1.3 L Fiat engine and a 150 cc Bajaj engine were given for disassembly. All processes were timed and most of the teams could keep it under 90 minutes for the car engine and 60 minutes for the bike engine. It was a tiresome, gruesome and exhausting process. Nevertheless, an unbelievable experience.

On day 5, students had to submit a project report along with their groups on a topic which was given at the starting of the workshop. And ours for instance was "Developing a 300cc bike engine to deliver both power and performance ". "All in all, it was a very good experience and all of us who qualified and are looking forward to attend the level-2 of the course to be held at IIT Bombay!", says a student, who attended the workshop.

Meine reise nach Deutschland

Ich bin am 4. Juni mit 17 Studenten nach Deutschland geflogen. Das Wetter hat mich schockiert. 17 Grad! Ich dachte, ich wäre zu Eis geworden. Ich habe in Hilden gewohnt und es ist 30 Minuten vom Institut für Internationale Kommunikation (IIK) entfernt. Alle von uns waren in verschiedenen Orten. Mit mir haben meine Freunde gewohnt. Am Montag hatten wir unsere schwierige Aufgabe, den Einstufungstest. Der Kurs war super: sehr interessante Lehrerinnen und die anderen Klassenkameraden waren auch sehr interaktiv. Das IIK hat viele Freizeitaktivitäten geplant. Die erste war ein Treffen in der Altstadt und dann sind wir zum Rheinturm gegangen. Unterricht von Montag bis Freitag und dann kam das lang erwartete Wochenende. Das IIK hat eine Führung nach Köln geplant. Köln war sehr schön. Der Kölner Dom, die Gebäude, die Menschen – alles war viel schwungvoller als in Düsseldorf. Wir haben auch das Schokoladenmuseum besucht. Ich habe viele neue Freunde gefunden. Wir sind auch nach Gelsenkirchen gefahren, wo eine Partneruniversität, die Westfälische Hochschule, liegt. Dort gab es einen Roboterwettbewerb. Ein Wochenende bin ich auch mit meinen Freunden nach Paris gereist. Ich hatte wirklich viel Spaß.

My trip to Germany

I flew on 4 June with 17 students to Germany. The weather was shocking. 17 degrees! I thought I would become ice. I lived in Hilden and it is 30 minutes from the Institute for International Communication (IIK). All of us were in different places. With my friends stayed. On Monday we had our difficult task, the placement test. The course was great: very interesting teachers and other classmates were also very interactive. The IIK has planned many activities. The first was a meeting in the old town and then we went to the Rhine Tower from Monday to Friday and then came the long-awaited weekend. The IIK has planned a guide to Cologne. Cologne was very nice. Cologne Cathedral, the buildings, the people - everything was much more lively than in Düsseldorf. We also visited the chocolate museum. I have found many new friends. We also went to Gelsenkirchen, where a partner university, the university is Westfälische. There was a robot competition. One weekend I have also traveled with my friends to Paris. I really had fun!

Graduation 2012-16

It is with immense pleasure that we announce that our students of the 2012-16 SUNY Farmingdale and Hartford batch have graduated and obtained their BS Mechanical Engineering degrees. We congratulate them and wish them all the very best for their future endeavours.

From The Director's Desk

I am extremely happy to learn that the students of PSGIAS have brought out an excellent journal, PERCEPTION, which records the various activities of the

students in addition to the details of special lectures delivered by visiting dignitaries. I am very happy to know that the editors have done a commendable job of putting together several interesting snippets, which are interesting to read. I look forward to more issues to be published in future.

-Dr.P.Radhakrishnan
Director, PSGIAS

Forthcoming Events

- September 16 - A 2 day ALP (Active Learning Program) session at Anaikatti for the 2nd & 3rd years.
- An Industrial Visit to PSG Neelambur Foundry for the students of first year.
- August 19th - 21st : A 3 day YES+ workshop on soft skills for the first year students

Life @ PSGIAS

After several years of school, I stepped into PSGIAS with lots of hope and expectation, just like everyone else in my class. PSG has given me a wonderful opportunity to listen to lectures from various people working with the industry and CEO's of some companies. Their speeches were very informative and motivating, and they inspired me to achieve something great. Stepping into the class after three days of orientation, I met people from different parts of the state, country as well. My favourite parts of PSG are the labs and the library. I was fascinated seeing the library for the first time, and was thrilled seeing story books of my favourite authors and magazines of my interest.

It's been a month in the college and I'm happy about what the college has got to offer me and I feel I have made the right choice.

Sad Demise

It is with deep sorrow and pain to inform you all, the sad demise of our alumni from the 2010-2014 batch, Jaawahar. May his soul rest in peace.
